Homework 4

Reading: Chapter 7 of OOA.

Problem 1 Write down scenarios for your solution to Problem 1 of Homework 3 that implement the following functionality
- edit the width and length of a column of the text,
- move a column around on a page,
- move a column from one page to another

When preparing the scenarios think about if and how each of the problem domain objects is involved in it.

Add message connections (and whatever else is necessary) to implement the created scenarios. Provide specifications to each Service involved in a scenario as it is described in Section 7.3.4 of OOA.

Problem 2 Start developing a model for the Degree Requirement Support domain (distributed in class)
